# Executive Summary

The Generative AI (GenAI) sphere is growing faster than ever before and being adopted in varying degrees among office workers across the US. Among its vast capabilities, GenAI has the potential to revolutionize the productivity of office workers, enabling them to work more efficiently and produce higher quality work products.

Our research was to understand the attitudes surrounding GenAI among office workers in the United States and understand their perceptions of the impact of this new technology on their current work and prospects. We asked them to evaluate the ways their company is adopting GenAI, the training and education being offered to them, the kinds of tools available to them, and how all of this is impacting their perceptions of the present and future.

The panel included all industries, departments, and job levels. It was geographically dispersed throughout the United States. Panelists were not asked to identify their educational level, although all were over 18, and the vast majority are between 25 and 65 years old.

This study is designed to help executives understand their workforce and draw inferences about the impacts of worker sentiment on the design of GenAI programs for our clients.

# Methodology

## Office Workers Survey

**1054** people participated in a  
**34** question survey

Respondents were recruited, screened, and paid through Centiment. Respondents were recruited through Centiment's panel according to our requirements that they be located within North America and over the age of 18.

## Scope/Purpose

These questions are designed to provide a better understanding of current adoption and attitudes towards GenAI technology at work.

# How would you rate your company's adoption of Generative AI (GenAI)?

**Head In the Sand**

We do not yet know enough about GenAI and are hesitant to adopt it across the organization.

24%

**Basic Experimentation**

We are piloting a few out-of-the-box commercial GenAI tools and/or have a few proofs of concept, but we don't yet have targeted use cases in production.

22%

**Focused Innovation**

We have a handful of GenAI deployments in production and continue to innovate for new forms of business value.

28%

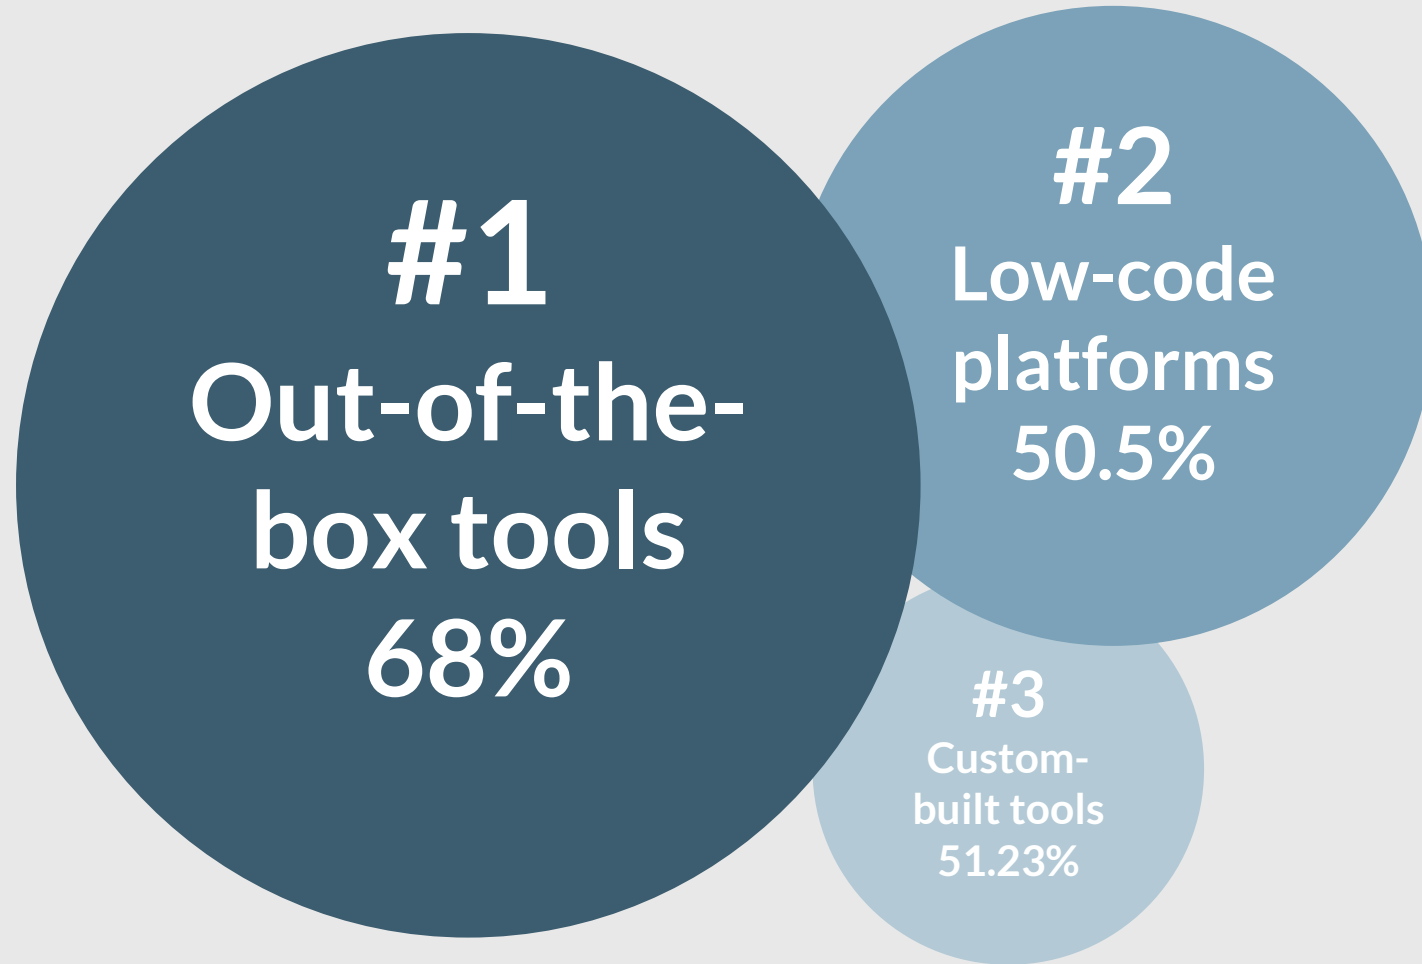

**All-In on AI**

GenAI is an integral part of our strategy, demonstrates regular business value, and new use cases are deployed to production responsibly and efficiently.

26%

# What kind of solutions are you deploying?

Rank by number of solutions in each category from most to least

\*This question was only presented to respondents who indicated they were piloting commercial solutions or have a handful of deployments in production on the prior question.

# For which use cases have you deployed GenAI solutions?

(Select all that apply)

\*This question was only presented to respondents who reported use of GenAI tools

**What kind of training and education about GenAI are you receiving from your employer?** (Select all that apply)

**57.5%**

Occasional  
Communication

**47.25%**

Guidelines and  
Documents

**43.55%**

Access to  
Generic Courses

**37.38%**

Hands-on  
Generic Training

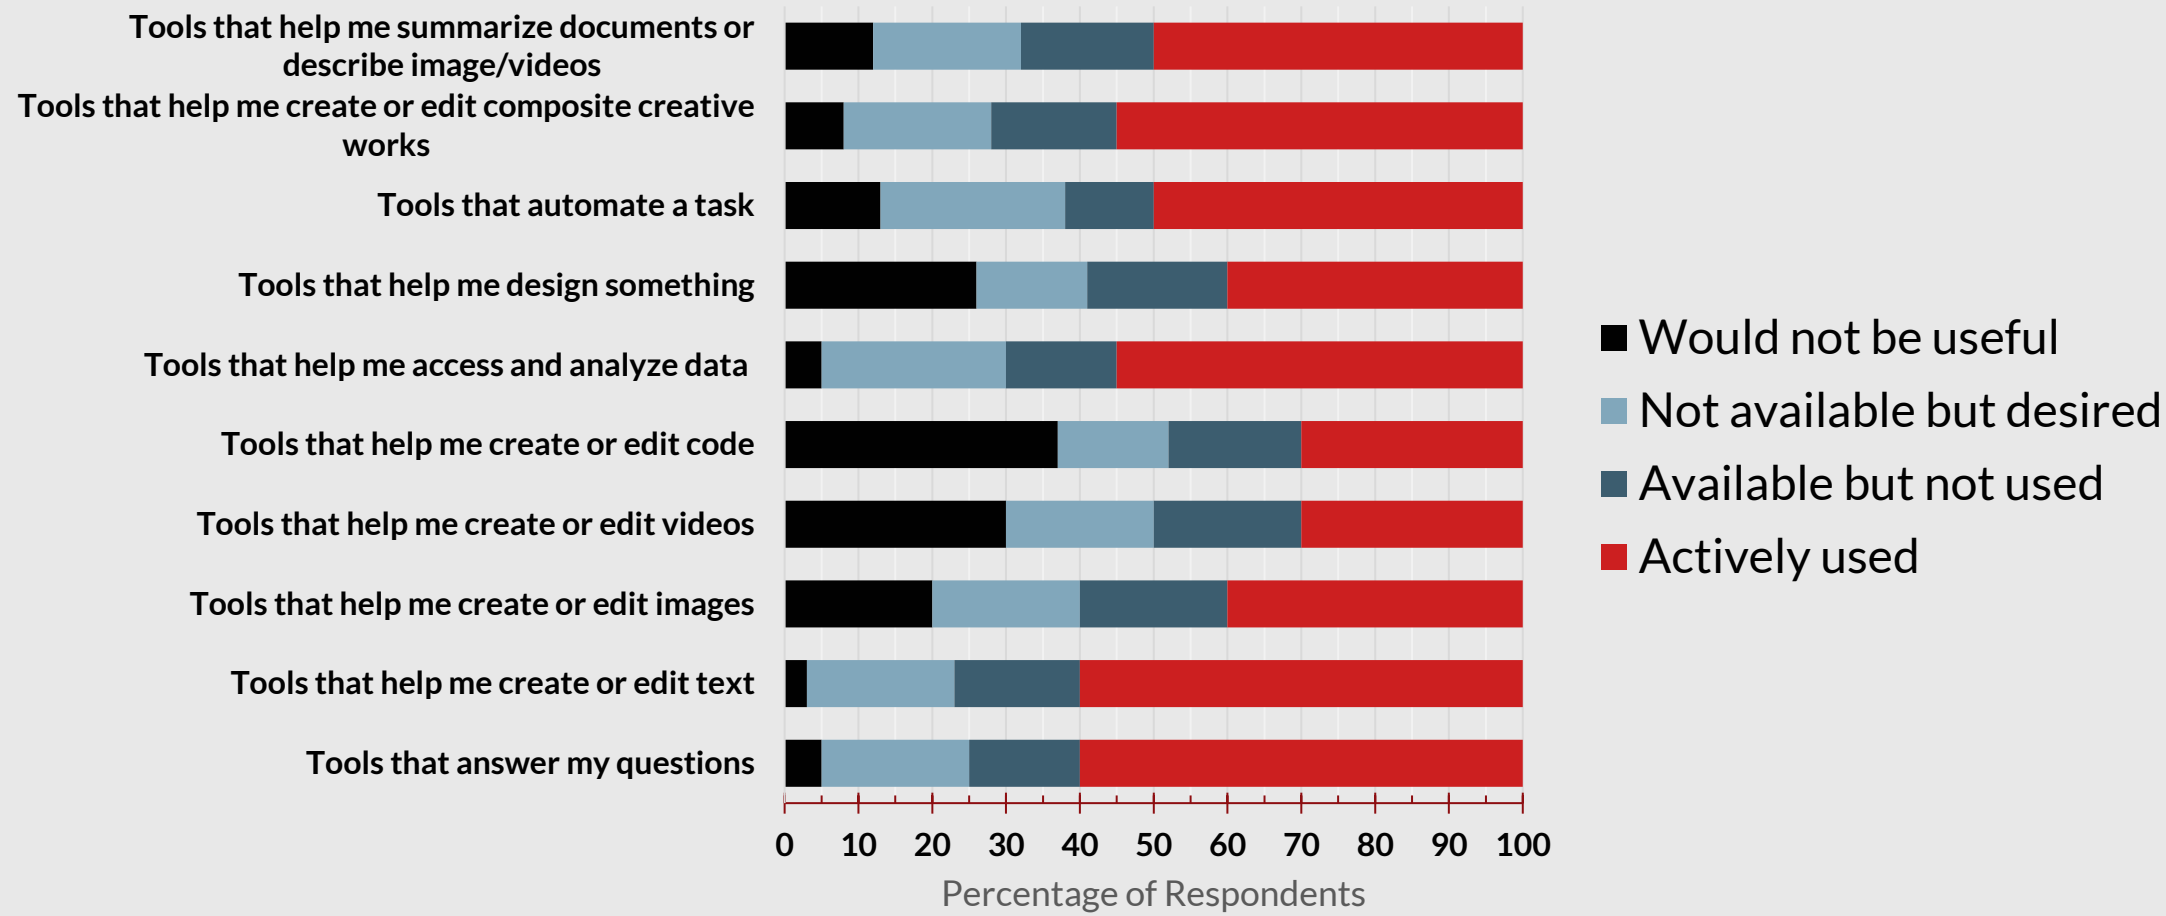

**34.44%**

Hands-on,  
Role-specific Training

**28.27%**

Templates, Prompt Libraries,  
or Other Efficiency Enhancers

At work, how would you describe each of these categories of GenAI tools?

What, if anything, is preventing you from using GenAI tools to be more efficient and effective at work?

\*if they picked "nothing," they could not select other categories

**When do you think AI will be able to perform  
50% of your job functions autonomously?**

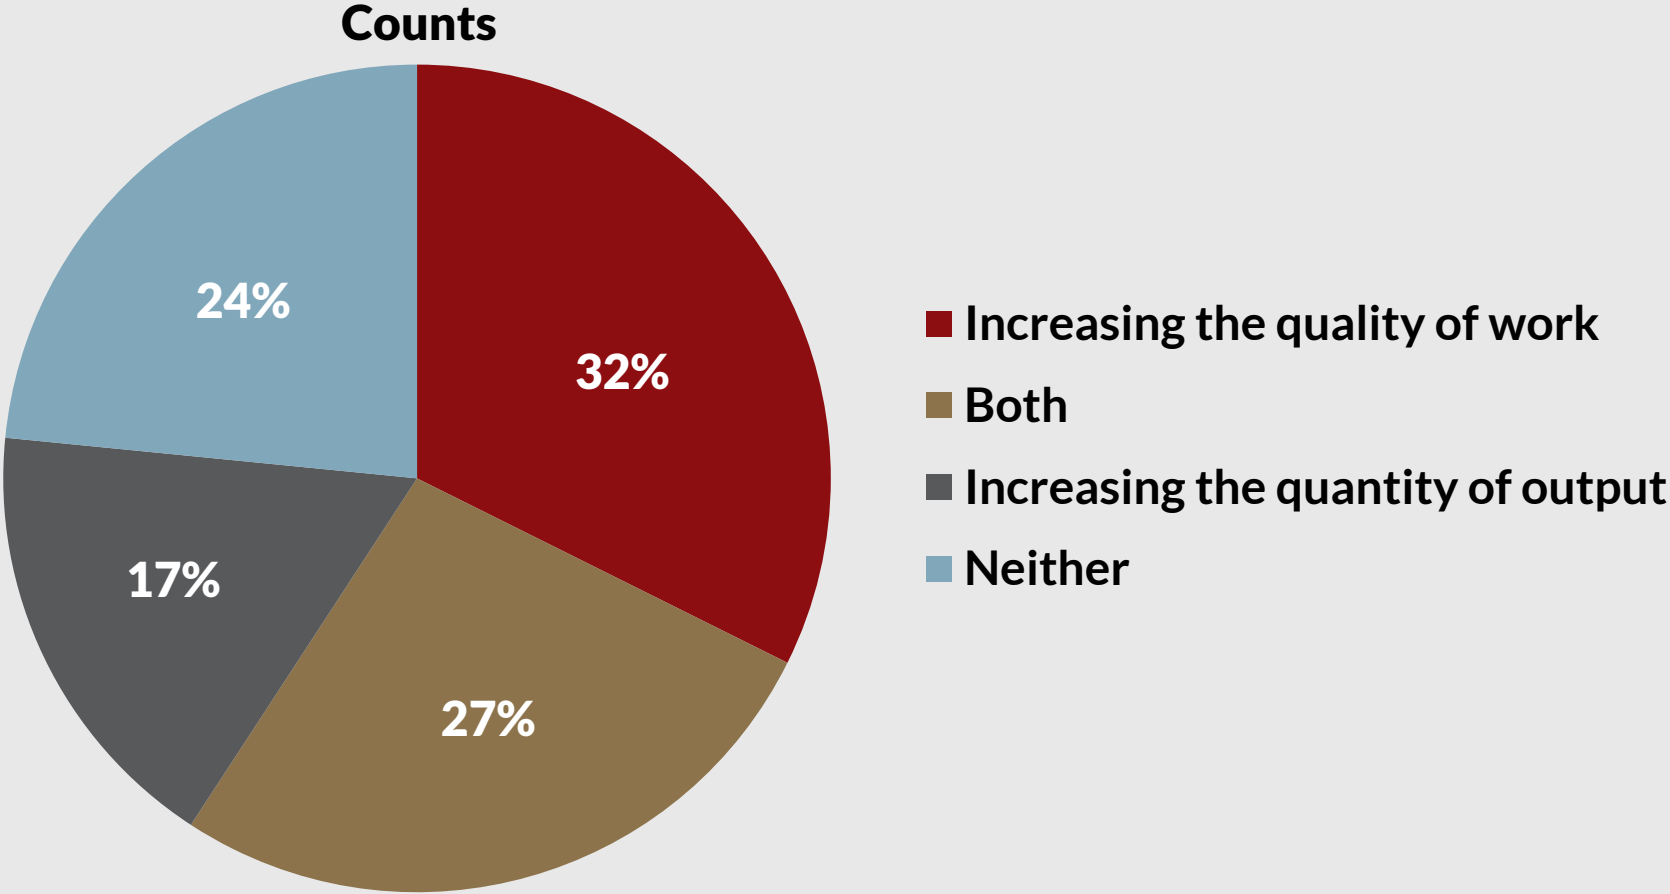

How do you think the following will change over the next two years due to AI Adoption?

How do you feel GenAI tools are impacting the quality of your work?

**When you consider the quality of work AI produces, how many years of work experience would you expect a comparable human to have?**

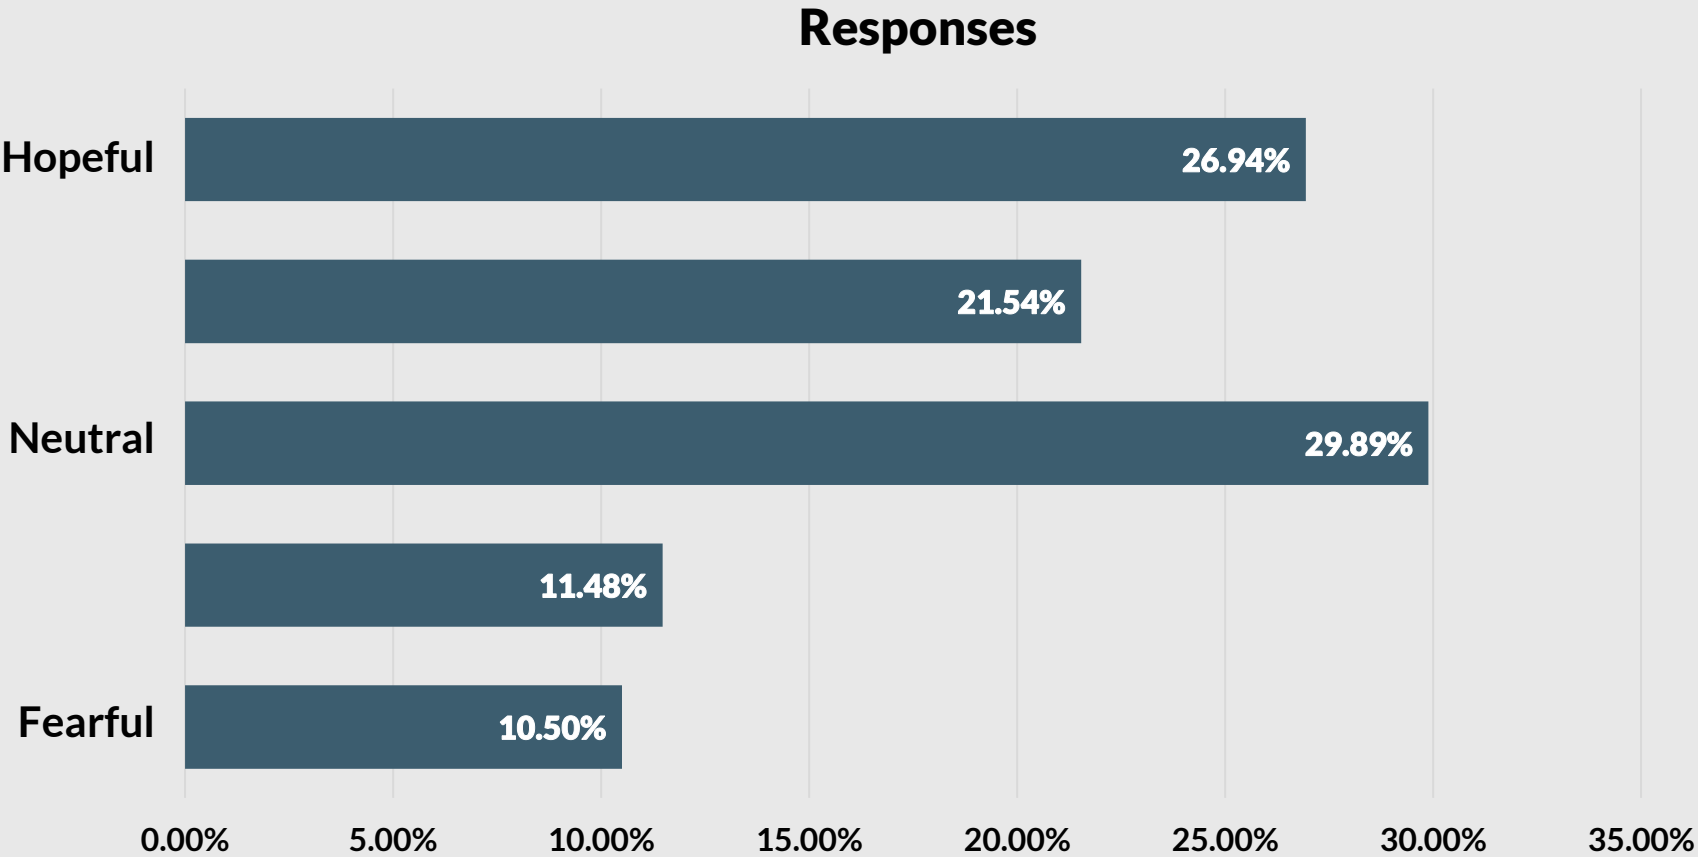

\*Respondents received this question if they answered that GenAI is "increasing the quality of their work" or "both" on previous question

# How much do you trust your employer to implement GenAI responsibly?

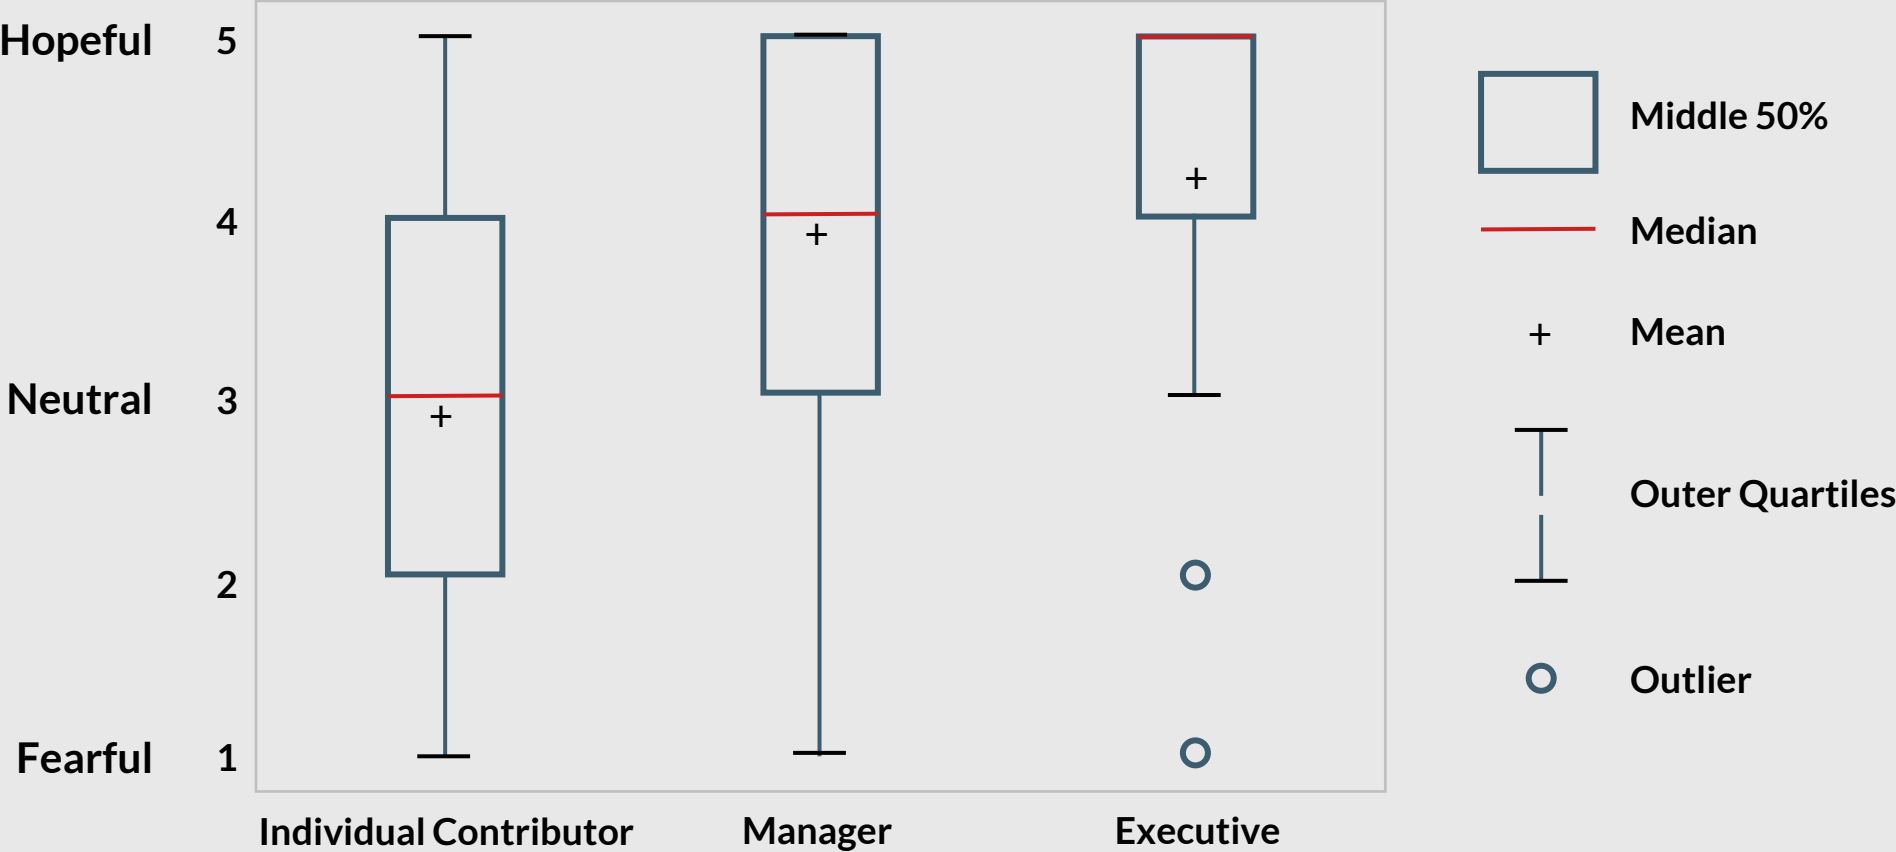

**How does the rapid adoption of GenAI technologies  
make you feel about your future job prospects?**

# How does the rapid adoption of GenAI technologies make you feel about your future job prospects?

\*Individual Contributors identified as “Entry Level”, “Individual Contributor” or “Senior Individual Contributor”; Managers identified as either “Manager” or “senior Manager”; Executives identified as either “Director” “Vice President” “Senior or Executive Vice President” or “C- level Executive”
